Eixo dominante
Core + Connectors + Testes + Compliance Docs

Veredito WABIX
9.1 / 10
Evolução forte e consistente.

1) Síntese executiva

- Houve avanço relevante do repositório em **engenharia de detecção**, **conectores** e **testes**.
- As releases **1.6.0** e **1.6.1** consolidam uma cadência de entrega com melhoria contínua.
- Compliance e documentação foram expandidos, com cobertura regional e material operacional para auditoria.
- A base está mais madura, mas ainda com oportunidade de desacoplamento de regras centrais e formalização de KPIs.

2) Distribuição do esforço

Diretório	Arquivos	+Linhas	-Linhas	Total
docs	39	1703	312	2015
tests	39	1673	229	1902
core	16	1250	181	1431
connectors	13	900	160	1060
(root)	9	601	102	703
report	2	354	115	469
api	5	232	35	267
config	3	204	41	245
scripts	6	92	3	95
.cursor	2	92	0	92

database	2	14	6	20
deploy	2	4	4	8

3) Arquivos de maior impacto

Arquivo	+Linhas	-Linhas	Total
report/generator.py	353	115	468
uv.lock	413	40	453
core/detector.py	325	69	394
docs/compliance-samples/compliance-sample-lgpd.yaml	342	44	386
connectors/filesystem_connector.py	336	45	381
core/archives.py	303	0	303
core/database.py	188	51	239
tests/test_aggregated_identification.py	195	33	228
config/loader.py	168	39	207
api/routes.py	160	31	191
tests/test_database.py	144	43	187
docs/plans/PORTFOLIO_AND_EVIDENCE_SOURCES.md	184	0	184
docs/plans/PLANS_TODO.md	136	43	179
tests/test_filesystem_scan_compressed_wiring.py	169	0	169
tests/test_file_scan_use_content_type_flag.py	152	0	152

4) Comparativo: já resolveu vs precisa resolver

✅ Resolvido

Tema	Status	Evidência
Detecção por tipo de conteúdo (PDF/content-type)	**Resolvido**	Implementada e documentada; melhora cobertura em casos de extensão enganosa.
Fortalecimento de documentação de compliance	**Resolvido**	Atualizações em frameworks (incluindo ISO/IEC 27701) e guias EN/PT-BR.
Governança de release	**Resolvido**	Releases 1.6.0 e 1.6.1 com versionamento, notas e ajustes de qualidade.

⚠️ Pendências / próximos passos

Tema	Status	Gap atual
Métricas operacionais/KPIs de release	**Pendente**	Ainda sem painel objetivo consolidado para lead time, falhas CI e rollback.
Arquitetura do núcleo de regras (desacoplamento)	**Parcial**	Core evoluiu bastante, mas ainda concentra lógica extensa em módulos críticos (ex.: detector/gerador).
Fechamento de itens de segurança contínua (vuln triage)	**Em progresso**	Planos citam Dependabot/Scout e triagem contínua, mas requer rotina formalizada de execução.

5) Commits-chave

Data	Hash	Autor	Resumo
2026-03-18	`4a6377c`	Fabio Tavares Leitão	Merge pull request #56 from FabioLeitao/docs-detect-host-64903
2026-03-18	`8ec5aac`	FabioLeitao	Add section 9 to PLAN_SELF_UPGRADE_AND_VERSION_CHECK.md detailing optional delivery via .deb packages and apt repository. Update PLANS_TODO.md to reflect this addition and clarify the complexity and gain associated with the implementation of this phase.
2026-03-18	`9b8d454`	Fabio Tavares Leitão	Merge pull request #55 from FabioLeitao/docs-detect-host-64903
2026-03-18	`e7d102a`	FabioLeitao	Update PLANS_TODO.md to prioritize security and maintenance tasks, including Dependabot alerts and Docker Hub Scout for image CVEs. Marked completion of compliance standards alignment and CNPJ validation phases. Added detailed steps for upcoming security reviews and feature work.
2026-03-18	`1c3927e`	Fabio Tavares Leitão	Merge pull request #54 from FabioLeitao/docs-detect-host-64903
2026-03-18	`7956c3b`	FabioLeitao	chore: update uv.lock version to 1.6.1
2026-03-18	`18018cf`	FabioLeitao	Release 1.6.1: version bump, release notes, docs and Ruff format
2026-03-18	`c72079e`	FabioLeitao	Update plans documentation to enhance clarity and organization. Added sections for framing, objectives, and artifacts in various plans, ensuring consistent formatting. Updated the status of the CNPJ alphanumeric format validation plan to reflect completed phases and improved the exclusion criteria in markdown linting tests.
2026-03-18	`8df351e`	Fabio Tavares Leitão	Merge pull request #53 from FabioLeitao/docs-detect-host-64903
2026-03-18	`922d1ba`	FabioLeitao	Add candidate titles and abstracts for thesis plan; update .gitignore for private artifacts
2026-03-17	`dc2947f`	FabioLeitao	Update PLANS_TODO.md to reflect completion of the magic-byte table and content type inference task. Marked the task as done, indicating progress in the documentation of supported formats.

2026-03-17	`d5e82c2`	FabioLeitao	Update compliance documentation to reflect ISO/IEC 27701 standards. Adjusted references in COMPLIANCE_FRAMEWORKS.md and its Portuguese version, ensuring consistency in terminology. Enhanced README.md to clarify the application's role in supporting compliance and audit preparation. Updated PLANS_TODO.md to track documentation tasks related to compliance standards alignment.
2026-03-17	`8abda0f`	Fabio Tavares Leitão	Merge pull request #52 from FabioLeitao/docs-detect-host-64903
2026-03-17	`5956177`	FabioLeitao	Update CNPJ documentation to clarify legacy and alphanumeric formats, including details on new regulations and opt-in detection. Adjust status of CNPJ alphanumeric format validation plan to in progress.
2026-03-17	`f3692f1`	FabioLeitao	Update compliance documentation to reflect ISO/IEC 27701 standards. Adjusted references in COMPLIANCE_FRAMEWORKS.md and its Portuguese version, ensuring consistency in terminology. Enhanced README.md to clarify the application's role in supporting compliance and audit preparation. Updated PLANS_TODO.md to track documentation tasks related to compliance standards alignment.
2026-03-17	`a516da0`	FabioLeitao	Document compliance standards alignment for ISO 27701, SOC 2, and FELCA in COMPLIANCE_FRAMEWORKS.md and its Portuguese counterpart. Added details on the application's role in supporting audit preparation and accountability through data discovery and mapping. Updated README.md to reflect these changes and enhance the compliance narrative. Updated PLANS_TODO.md to track the completion of documentation tasks related to compliance standards.
2026-03-17	`668b71c`	FabioLeitao	Enhance README documentation by adding details on shadow IT risks and the importance of uncovering hidden data sources. Updated sections on data ingestion capabilities and compliance support, including new content-type detection features and roadmap items for future improvements.
2026-03-17	`23244af`	FabioLeitao	Refine API host resolution and update documentation for safer defaults
2026-03-17	`b0b30bf`	FabioLeitao	Update API host resolution in main.py for improved flexibility
2026-03-17	`b7205c0`	Fabio Tavares Leitão	Merge pull request #51 from FabioLeitao/code-format-64903

6) Recomendação executiva WABIX

1. Adicionar painel de **KPIs de release** e segurança operacional.
2. Criar bateria de **testes de contrato** para saída de relatórios e APIs críticas.
3. Desacoplar regras centrais em módulos de domínio para reduzir risco de regressão.
4. Manter disciplina de release com snapshot de documentação por versão.
